Annual leave advance:
another alternative from the labor point of
view to respond to the outbreak of
Coronavirus (Covid-19)

March, 20th 2020

The Ministry of Labour and Social Security issued Resolution No. 55/2020, which exceptionally authorizes to take in advance the leave to be generated in 2020.

It is required that it be agreed between the worker and the employer and based on the health emergency situation that our country is facing due to the outbreak of Coronavirus (Covid-19).

The agreement must comply with the following:

- Written agreement must be presented before the Ministry of Labour and Social Security so that the office of the General Inspector becomes aware of it.
- It must correspond to the entire period of the leave or to the previously agreed fraction (in the case of having an agreement to split the leave), in which case this period may not be less than 10 days.

Remuneration:

The remuneration will be paid in the same manner and opportunity established in the current regulations.
